Healora – Global Medical Tourism Platform

Presented by: Aman Koli

Program: B.Tech Computer Science & Engineering

Batch: 2025 – 2029 | Semester II

University: ITM Skills University

Problem Statement

Medical tourism is growing rapidly as patients travel across countries to access affordable and high-quality healthcare services. However, patients often face several challenges when trying to find reliable treatment options abroad.

Many people struggle to identify trusted hospitals, qualified doctors, and transparent treatment costs across different countries.

This lack of clear and reliable information makes the process of choosing international healthcare complicated and confusing for patients.

Proposed Solution – Healora Platform

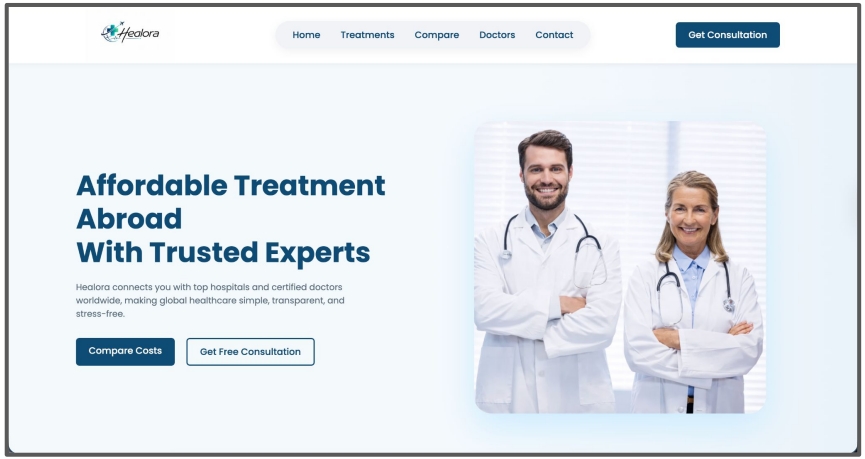
Healora is a web-based platform designed to simplify the process of medical tourism by providing reliable and organized healthcare information in a single platform.

The system helps patients explore available medical treatments, compare treatment costs across different countries, and discover experienced doctors from internationally recognized hospitals.

By combining treatment exploration, doctor discovery, and cost comparison into one interface, Healora helps patients make informed healthcare decisions and reduces the complexity of searching for medical services abroad.

Key Features

- Treatment exploration across multiple countries
- Transparent comparison of treatment costs
- Discovery of experienced doctors and specialists
- Secure consultation request system for patients



Working Method – Healora Platform

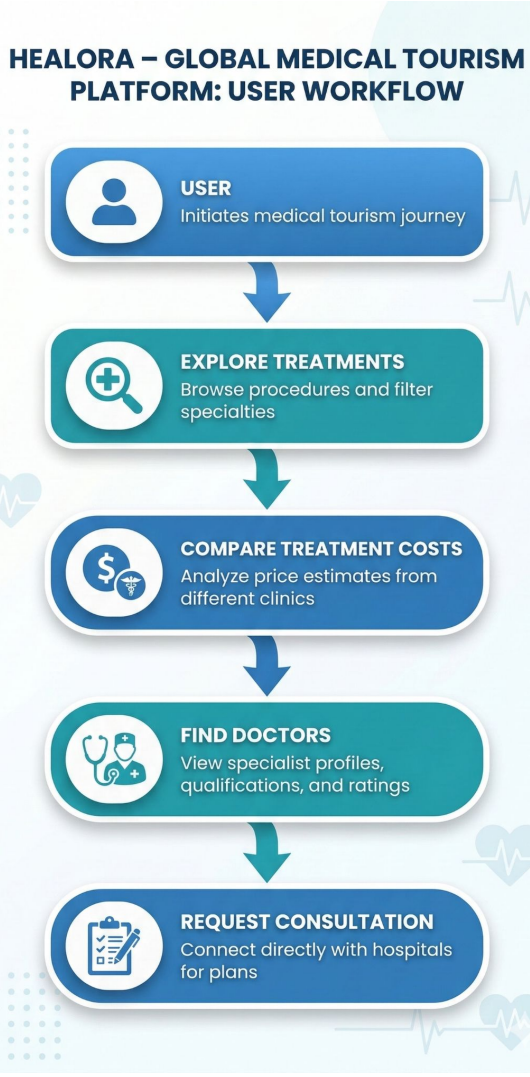
The Healora platform is developed using modern web technologies to create a responsive and interactive healthcare information system.

Technologies Used

HTML
Used to structure the content and layout of all webpages.

CSS
Used to design the user interface, create responsive layouts, and add animations and styling.

JavaScript
Used to add interactivity such as treatment comparison, filtering systems, and form validation.



Conclusion

Healora provides a centralized platform that simplifies the process of medical tourism by bringing treatment information, doctor discovery, and cost comparison into a single system.

The platform helps patients explore global healthcare options easily and make informed decisions before choosing medical treatments abroad.

By using modern web technologies such as **HTML, CSS, and JavaScript**, Healora offers a responsive, interactive, and user-friendly experience.

Key Benefits

- Easy access to global medical treatment information
- Transparent comparison of treatment costs
- Discovery of trusted doctors and hospitals
- Simplified consultation request process
